

canopus WHITEPAPER

DECENTRALIZED GALACTIC NETWORK | AVALANCHE ECOSYSTEM

Canopus is the first decentralized galactic network protocol in Avalanche Ecosystem which is mainly focused on stability, improvement of transaction speed and reducing the fee. The main purpose is to be the fastest solution on micropayments.

Canopus (OPUS) is unique functionality and control model never seen before in the Network Protocol. The platform also focuses on token issuance, synthetic staking between chains, interoperability, and more interesting cross-chain features in development.

Canopus Network LLC does not provide financial services and provides users with purely technical services. Canopus Network LLC is not responsible for any loss or damage incurred by the user as a result of using the Service.

1. MISSION, VISION, VALUES

MISSION

Our mission is to become the most influential project, based on the Book, in the world by overcoming the gap between traditional financial markets and cryptocurrency.

VISION

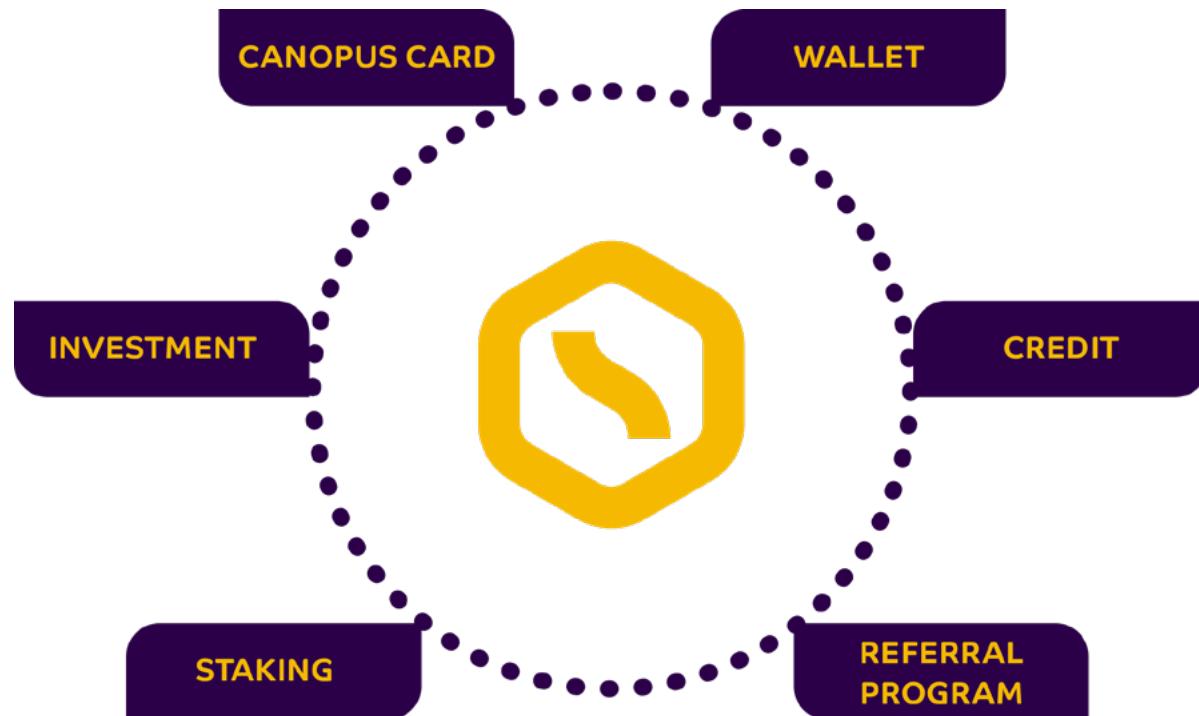

We are always looking at new ways of trying to exceed customers' expectations by providing the best products and services, the best way we can.

VALUES

We built our relationship on trust, simplicity, and integrity, where everyone freely expresses themselves for fruitful cooperation. This helps us to expand collectively and create innovative solutions. We support the same values in the development of our products and provide our customers with the highest order of service.

2. PRODUCTS BASED ON CANOPUS TOKEN

Ultimately in conclusion we offer secure, fast and transparent fundraising that empowers the right teams to help move the space forward. Canopus is an investor-focused platform that supports rather than confuses members by offering an environment in which everyone wins. Our culture is built on rewarding innovative and talented teams that deliver real value through rewarding apps and forward-thinking development.
